

Community Assistance Service

Iron Road acknowledges that for some landowners and members of the community, this period in the CEIP timeline is particularly difficult. In recognition of this, the Company continues to extend its internal support program to those families impacted by the proposed mine, infrastructure corridor and port. This service is provided through DTC which is a professional and **confidential** counselling service accessible by phone, internet, video conference or in person on the Eyre Peninsula. More information can be found in brochures available from the Telecentre or on the Iron Road website under 'Stakeholder Engagement Contacts'. This support service will not incur any cost to those who choose to make use of it.

CEIP Approvals Update

With public submissions on the CEIP Mining Lease Proposal and Environmental Impact Statement closing on 2 February, we are now commencing work on documents that will outline our responses to various questions raised in community and government submissions.

Iron Road would like to take the opportunity to thank everyone who took the time to formally make a contribution to the submissions process.
