

Central Eyre Iron Project Environmental Impact Statement

Volume One

1	Introduction.....	1-1
1.1	Iron Road Company Profile.....	1-2
1.2	History of the CEIP.....	1-3
1.2.1	Environmental Policy.....	1-4
1.3	CEIP Overview.....	1-4
1.3.1	Overview of Project Components.....	1-5
1.3.2	Overview of the Project Sites and Localities.....	1-6
1.4	Statutory Approvals Process.....	1-8
1.4.1	State Approvals.....	1-8
1.4.2	Commonwealth Approvals.....	1-8
1.4.3	Objectives of the EIS.....	1-8
1.4.4	Assessment Process.....	1-9
1.5	Document Structure.....	1-10
2	Project Justification.....	2-1
2.1	Project Objectives.....	2-1
2.2	Market Demand and Supply for Iron Concentrate.....	2-1
2.2.1	Current and Predicted Iron Ore Demand.....	2-2
2.2.2	Magnetite vs Hematite.....	2-3
2.3	Iron Road’s Competitive Advantage.....	2-3
2.4	Consequences of Not Proceeding.....	2-5
2.4.1	Specific Benefits Forgone.....	2-6
2.4.2	Strategic Opportunity Costs.....	2-7
3	Project Alternatives.....	3-1
3.1	Location of Port Site.....	3-2
3.1.1	Existing Export Facilities.....	3-2
3.1.2	Greenfield Port Option Evaluation Criteria.....	3-6
3.1.3	Greenfield Location near Elliston, Upper West Eyre Peninsula.....	3-6
3.1.4	Greenfield Location near Drummond Point, Lower West Eyre Peninsula.....	3-7
3.1.5	Greenfield Location near Coles Point, Lower West Eyre Peninsula.....	3-7
3.1.6	Greenfield Location near Arno Bay, Spencer Gulf.....	3-7
3.1.7	Greenfield Location near Gibbon Point, Spencer Gulf.....	3-7
3.1.8	Greenfield Location at Cape Hardy.....	3-7
3.2	Iron Concentrate Transport.....	3-8
3.2.1	Slurry Pipeline.....	3-10
3.2.2	Shared Use of Cummins Buckleboo Railway.....	3-10
3.2.3	Alternative Railway Line (Option A) Following Cummins Buckleboo Railway.....	3-10
3.2.4	Alternative Railway Line (Option B).....	3-10
3.2.5	Selected Option – Proposed Railway Line.....	3-11
3.3	Mine Site Water Supply.....	3-11
3.3.1	Desalination Plant at Elliston.....	3-12
3.3.2	Seawater Supply from Cape Hardy.....	3-12
3.3.3	Selected Option – Proposed Borefield near Kielpa.....	3-12
3.4	Power Supply.....	3-15
3.4.1	Option A Gas Fired Power Station.....	3-15

3.4.2	Option B Private Transmission Line to the Proposed Mine from Cultana	3-15
3.4.3	Selected Option - Private Transmission Line to the Proposed Mine from Yadnarie	3-15
3.5	Process Optimisation	3-17

4 Project Description..... 4-5

4.1	Proposed Mine.....	4-5
4.2	Infrastructure Corridor Design Description	4-8
4.2.1	Railway Line.....	4-12
4.2.2	Borefield and Water Pipeline	4-24
4.2.3	Power Transmission Line.....	4-27
4.3	Port Design Description	4-29
4.3.1	Materials Handling	4-32
4.3.2	Marine Infrastructure.....	4-38
4.3.3	Supporting Infrastructure.....	4-45
4.3.4	Construction Camp.....	4-53
4.4	Long-Term Employee Village	4-55
4.5	Construction Phase.....	4-59
4.5.1	Indicative Construction Programme and Workforce	4-59
4.5.2	Temporary Laydown Areas.....	4-60
4.5.3	Module Offloading Facility Construction.....	4-60
4.5.4	Earthworks and Materials Crushing and Screening	4-60
4.5.5	Concrete Batching Activities.....	4-61
4.5.6	Modules.....	4-61
4.5.7	Construction Water Supply	4-62
4.5.8	Construction Power Supply	4-62
4.5.9	Temporary Site Offices and Amenities.....	4-63
4.5.10	Construction Waste Management	4-63
4.6	Operation Phase	4-63
4.6.1	Operational Workforce.....	4-63
4.6.2	Railway Line Operations.....	4-64
4.6.3	Water Supply	4-65
4.6.4	Port Operations	4-66
4.6.5	Waste Management	4-72
4.7	Rehabilitation Strategy	4-72
4.8	Summary.....	4-73

5 Statutory Framework..... 5-1

5.1	Approvals Process.....	5-1
5.1.1	Secondary Approvals.....	5-3
5.2	Commonwealth Legislative Requirements and Strategic Framework	5-3
5.2.1	Environment Protection and Biodiversity Conservation Act 1999.....	5-3
5.2.2	Other Legislation	5-4
5.3	State Legislative Requirements and Strategic Framework	5-5
5.3.1	Development Act 1993.....	5-5
5.3.2	Environment Protection Act 1993.....	5-6
5.3.3	Native Vegetation Act 1991	5-7
5.3.4	Other State Legislation	5-7
5.3.5	State Strategic Framework	5-9
5.4	Local Requirements	5-12
5.4.1	Local Strategic Framework	5-12
5.4.2	Development Plan Framework.....	5-13

5.4.3	Changes to Zoning Required to Support CEIP Infrastructure	5-21
6	Stakeholder Engagement	6-1
6.1	Introduction	6-1
6.2	Applicable Legislation and Standards	6-1
6.3	Engagement and Consultation Approach	6-2
6.4	Stakeholders	6-3
6.5	Engagement Programme	6-8
6.5.1	Engagement Activities	6-8
6.6	Identifying and Managing Benefits and Issues	6-16
6.6.1	Benefits Raised	6-16
6.6.2	Issues Raised	6-17
6.6.3	Stakeholder Benefits and Issues Register	6-17
6.7	Conclusion	6-18
7	Physical Environment	7-1
7.1	Introduction	7-1
7.2	Assessment Methods	7-2
7.3	Existing Environmental Values	7-2
7.3.1	Climate	7-2
7.3.2	Wind	7-3
7.3.3	Natural Hazards	7-9
7.3.4	Topography	7-11
7.3.5	Soils and Geology	7-15
7.3.6	Marine	7-17
7.4	Projected Environmental Values	7-17
7.4.1	Climate Change Predictions	7-17
8	Land Use and Tenure	8-1
8.1	Assessment Methods	8-1
8.2	Existing Environmental Values	8-1
8.2.1	Primary Production and Agriculture	8-3
8.2.2	Nature Conservation	8-4
8.2.3	Mineral Resource Exploration and Extraction	8-7
8.2.4	Marine-Based Activity	8-10
8.2.5	Townships and Residential Areas	8-12
8.2.6	Existing Land Use of the CEIP Infrastructure Sites	8-14
8.2.7	Land Tenure	8-17
9	Risk and Impact Definition	9-1
9.1	Impact Assessment	9-2
9.2	Risk Assessment	9-6
10	Air Quality	10-1
10.1	Applicable Legislation and Standards	10-1
10.2	Assessment Method	10-2
10.3	Existing Environment	10-3
10.3.1	Existing Background Air Quality	10-3
10.3.2	Sensitive Receivers	10-5
10.3.3	Summary of Key Environmental Values	10-8

10.4	Design Measures to Protect Environmental Values	10-8
10.4.1	Proposed Infrastructure Corridor	10-8
10.4.2	Proposed Port Development	10-8
10.5	Impact Assessment	10-11
10.5.1	Sources of Air Emissions	10-11
10.5.2	Predicted Emissions during Construction of CEIP Infrastructure	10-15
10.5.3	Predicted Emissions during Operation of the CEIP Infrastructure Corridor	10-16
10.5.4	Predicted Emissions during Operation of the Port Development	10-17
10.5.5	Summary of Impacts	10-21
10.6	Control and Management Strategies	10-23
10.7	Residual Risk Assessment	10-24
10.7.1	Construction Air Quality Risks	10-24
10.7.2	Operational Air Quality Risks	10-24
10.7.3	Summary of Risks	10-25
10.8	Findings and Conclusion	10-27
11	Climate Change and Greenhouse Gas	11-1
11.1	Applicable Legislation and Standards	11-2
11.1.1	Commonwealth	11-2
11.1.2	South Australia	11-3
11.1.3	Local	11-5
11.2	Assessment Method	11-5
11.2.1	Climate Change	11-5
11.2.2	Greenhouse Gas	11-5
11.3	Climate Change	11-7
11.3.1	Climate Change Predictions	11-7
11.3.2	Design Measures to Manage Climate Change	11-8
11.3.3	Impact Assessment: Climate Change	11-9
11.3.4	Control and Management Strategies: Climate Change	11-9
11.3.5	Residual Risk Assessment: Climate Change	11-9
11.4	Greenhouse Gas	11-16
11.4.1	Existing Environment	11-16
11.4.2	Design Measures to Protect Environmental Values	11-17
11.4.3	Impact Assessment: Greenhouse Gas	11-18
11.4.4	Summary of Impacts: Greenhouse Gas	11-22
11.4.5	Control and Management Strategies: Greenhouse gas	11-23
11.4.6	Residual Risk Assessment: Greenhouse Gas	11-25
11.5	Findings and Conclusion	11-26
12	Noise and Vibration	12-1
12.1	Applicable Legislation and Standards	12-1
12.1.1	Explanation of Noise Terms and Units	12-1
12.1.2	Construction Noise Criteria	12-3
12.1.3	Construction Blasting Criteria	12-3
12.1.4	Rail Noise Criteria	12-4
12.1.5	Borefield Noise Criteria	12-5
12.1.6	Port Noise Criteria	12-6
12.1.7	Ground Vibration Criteria – Construction and Operation	12-7
12.2	Assessment Method	12-8
12.3	Existing Environment	12-9
12.3.1	Existing Noise Environment	12-9

12.3.2	Existing Vibration Sources	12-10
12.3.3	Sensitive Receivers	12-10
12.3.4	Summary of Key Environmental Values	12-13
12.4	Design Measures to Protect Environmental Values	12-13
12.4.1	Proposed Infrastructure Corridor	12-13
12.4.2	Proposed Port Development	12-14
12.5	Impact Assessment	12-14
12.5.1	Noise and Vibration Sources	12-14
12.5.2	Predicted Noise Levels.....	12-19
12.5.3	Predicted Vibration Levels.....	12-30
12.5.4	Summary of Impacts.....	12-31
12.6	Control and Management Strategies.....	12-33
12.7	Residual Risk Assessment	12-34
12.7.1	Construction Noise and Vibration Risks	12-34
12.7.2	Operational Noise and Vibration Risks.....	12-34
12.7.3	Summary of Risks	12-35
12.8	Findings and Conclusion	12-36
13	Terrestrial Flora and Fauna.....	13-1
13.1	Applicable Legislation and Standards	13-1
13.2	Assessment Method	13-3
13.2.1	Infrastructure Corridor	13-3
13.2.2	Port Site	13-4
13.3	Existing Environment	13-7
13.3.1	Regional Context	13-7
13.3.2	Infrastructure Corridor	13-17
13.3.3	Port Site	13-40
13.3.4	Long-Term Employee Village.....	13-58
13.3.5	Summary of Key Environmental Values	13-60
13.4	Design Measures to Protect Environmental Values	13-61
13.4.1	Proposed Infrastructure Corridor	13-61
13.4.2	Proposed Port Development	13-62
13.5	Impact Assessment	13-62
13.5.1	Sources of Impacts	13-62
13.5.2	Vegetation Clearance	13-63
13.5.3	Habitat Fragmentation	13-68
13.5.4	Effects on Listed Flora	13-69
13.5.5	Effects on Fauna	13-71
13.5.6	Light	13-74
13.5.7	Noise.....	13-75
13.5.8	Dust	13-76
13.5.9	Recreational Activities.....	13-77
13.5.10	Effects on Listed Ecological Communities	13-77
13.5.11	Summary of Impacts.....	13-77
13.6	Control and Management Strategies.....	13-80
13.6.1	Environmental Offsets.....	13-83
13.7	Residual Risk Assessment	13-83
13.7.1	Summary of Risks	13-88
13.8	Findings and Conclusion	13-90

Volume Two

14	Marine and Coastal Environment	14-1
14.1	Applicable Legislation and Standards	14-1
14.2	Assessment Method	14-2
14.3	Existing Environment	14-5
14.3.1	Bathymetry	14-6
14.3.2	Hydrodynamic Environment	14-7
14.3.3	Seabed Conditions	14-8
14.3.4	Water Quality	14-10
14.3.5	Benthic Habitats and Flora	14-10
14.3.6	Benthic Fauna	14-14
14.3.7	Marine Megafauna	14-15
14.3.8	Fish Species	14-20
14.3.9	Invasive Marine Species	14-21
14.3.10	Marine Noise and Vibration	14-22
14.3.11	Fisheries and Aquaculture	14-23
14.3.12	Summary of Key Environmental Values	14-26
14.4	Design Measures to Protect Environmental Values	14-27
14.5	Impact Assessment	14-28
14.5.1	Habitat Clearance	14-29
14.5.2	Noise and Vibration	14-30
14.5.3	Bathymetry and Hydrodynamics	14-32
14.5.4	Turbidity and Sedimentation	14-34
14.5.5	Light Spill	14-35
14.5.6	Fisheries and Aquaculture	14-35
14.5.7	Release of Iron Concentrate into Marine Environment	14-35
14.5.8	Shading of Seabed	14-36
14.5.9	Surface Water Runoff	14-37
14.5.10	Restricted Public Access to Coastal Reserve	14-37
14.5.11	Invasive Marine Species	14-38
14.5.12	Summary of Impacts	14-38
14.6	Control and Management Strategies	14-40
14.6.1	Underwater Noise	14-40
14.6.2	Construction and Environmental Management	14-43
14.6.3	Summary of Control and Management Strategies	14-45
14.7	Residual Risk Assessment	14-47
14.7.1	Ship Strike	14-47
14.7.2	Seagrass Loss or Gain	14-48
14.7.3	Artificial Light Spill	14-49
14.7.4	Turbidity and Sedimentation	14-50
14.7.5	Spills and Discharges into Marine Environment	14-50
14.7.6	Marine Pests	14-52
14.7.7	Summary of Risks	14-54
14.8	Findings and Conclusion	14-56
14.8.1	Findings and Conclusions on EPBC Matters	14-56
15	Surface Water	15-1
15.1	Applicable Legislation and Standards	15-1
15.2	Assessment Method	15-2

15.3	Existing Environment	15-2
15.3.1	Rainfall	15-2
15.3.2	Existing Drainage and Watercourses	15-3
15.3.3	Water Protection Areas	15-9
15.3.4	Water Users	15-9
15.3.5	Water Quality	15-9
15.3.6	Summary of Key Environmental Values	15-10
15.4	Design Measures to Protect Environmental Values	15-11
15.4.1	Port Site	15-12
15.4.2	Infrastructure Corridor	15-12
15.4.3	Long-Term Employee Village	15-12
15.5	Impact Assessment	15-13
15.5.1	Altered Surface Water Regimes in Existing Creeks and Drainage Lines	15-13
15.5.2	Hardstand and Roofed Areas Increasing the Proportion of Rainfall Runoff	15-13
15.5.3	Erosion	15-13
15.5.4	Restriction of Overland Flow	15-13
15.5.5	Summary of Impacts	15-14
15.6	Control and Management Strategies	15-15
15.7	Residual Risk Assessment	15-16
15.7.1	Erosion	15-16
15.7.2	Contamination of Surface Water	15-17
15.7.3	Summary of Risks	15-17
15.8	Findings and Conclusion	15-17

16 Groundwater 16-3

16.1	Applicable Legislation and Standards	16-3
16.2	Assessment Method	16-4
16.3	Existing Environmental Values	16-5
16.3.1	Hydrology	16-5
16.3.2	Geological Setting	16-6
16.3.3	Regional Hydrogeology	16-7
16.3.4	Groundwater Receptors	16-10
16.3.5	Summary of Key Environmental Values	16-12
16.4	Design Modifications to Protect Environmental Values	16-14
16.5	Impact Assessment	16-15
16.5.1	CEIP Infrastructure Water Affecting Activities	16-15
16.5.2	Predicted Effects of Proposed Borefield Operation	16-16
16.5.3	Predicted Effects from Infrastructure Corridor Construction Wells	16-20
16.5.4	Predicted Effects due to Groundwater Management at the Proposed Port Site ...	16-21
16.5.5	Predicted Effects to Groundwater as a Result of Infrastructure	16-21
16.5.6	Potential Impacts to Groundwater Quality through Release of Contaminants	16-21
16.5.7	Summary of Impacts	16-21
16.6	Control and Management Strategies	16-22
16.7	Residual Risk Assessment	16-23
16.7.1	Construction Groundwater Risks	16-23
16.7.2	Operation Groundwater Risks	16-23
16.7.3	Summary of Risks	16-25
16.8	Findings and Conclusion	16-27

17	Soil and Land Quality.....	17-1
17.1	Applicable Legislation and Standards	17-1
17.2	Assessment Method	17-2
17.3	Existing Environment	17-2
17.3.1	Topsoil and Subsoil.....	17-2
17.3.2	Acid Sulfate Soils.....	17-6
17.3.3	Site Contamination.....	17-8
17.3.4	Summary of Key Environmental Values	17-10
17.4	Design Measures to Protect Environmental Values	17-11
17.5	Impact Assessment	17-11
17.5.1	Loss of Topsoil During Stockpiling	17-11
17.5.2	Soil Compaction.....	17-12
17.5.3	Contamination of Soil.....	17-12
17.5.4	Disturbance of Existing Site Contamination or ASS.....	17-12
17.5.5	Summary of Impacts.....	17-12
17.6	Control and Management Strategies.....	17-13
17.7	Residual Risk Assessment	17-14
17.7.1	Contamination of Land.....	17-15
17.7.2	Disturbance of Existing Site Contamination	17-15
17.7.3	Disturbance of Existing Acid Sulfate Soils.....	17-15
17.7.4	Elevated Soil Salinity.....	17-15
17.7.5	Loss of Soil Quality.....	17-16
17.7.6	Dune Instability.....	17-16
17.7.7	Summary of Risks	17-17
17.8	Findings and Conclusion	17-17
18	Traffic and Transport.....	18-1
18.1	Applicable Legislation and Standards	18-1
18.2	Assessment Methods.....	18-2
18.3	Existing Transport Environment	18-4
18.3.1	Eyre Peninsula Highway Network	18-4
18.3.2	Local Road Network.....	18-7
18.3.3	Road Safety.....	18-11
18.3.4	Rail Network.....	18-13
18.3.5	School Bus Routes	18-13
18.3.6	Public Transport	18-13
18.4	Design Modifications to Protect the Transport Network	18-13
18.5	Impact Assessment	18-15
18.5.1	Traffic Generated During Construction.....	18-15
18.5.2	Traffic Capacity Impacts During Construction.....	18-21
18.5.3	Traffic Generated During Operations.....	18-22
18.5.4	Traffic Capacity Impacts from Operational Traffic	18-26
18.5.5	Impacts to School Bus Operations.....	18-27
18.5.6	Pavement Condition and Wear	18-28
18.5.7	Intersection Capacity.....	18-28
18.5.8	Impacts on the Cummins-Buckleboo Railway Operations	18-29
18.5.9	Rail Movements and Traffic Delays at Level Crossings	18-31
18.5.10	Changes to Local Access from Road Closures and Road Realignments	18-31
18.5.11	Summary of Impacts.....	18-32
18.6	Control and Management Strategies.....	18-33

18.7	Residual Risk Assessment	18-34
18.7.1	Construction Traffic and Transport Risks	18-34
18.7.2	Operation Traffic and Transport Risks	18-35
18.7.3	Summary of Risks	18-36
18.8	Findings and Conclusion	18-37
19	Aboriginal Heritage and Native Title	19-3
19.1	Applicable Legislation and Standards	19-3
19.2	Assessment Method	19-4
19.2.1	Indigenous Land Use Agreement	19-4
19.2.2	Aboriginal Heritage Survey	19-4
19.3	Existing Environment	19-6
19.3.1	Existing Information about Aboriginal Heritage	19-6
19.3.2	Aboriginal Connection with Land on the Eyre Peninsula	19-8
19.3.3	Native Title	19-8
19.3.4	Survey Findings	19-9
19.3.5	Summary of Key Environmental Values	19-12
19.4	Design Measures to Protect Environmental Values	19-13
19.4.1	Proposed Infrastructure Corridor	19-13
19.4.2	Proposed Port Development	19-13
19.5	Impact Assessment	19-14
19.5.1	Sources of Impacts	19-14
19.5.2	Infrastructure Corridor	19-14
19.5.3	Long-Term Employee Village	19-15
19.5.4	Port Site	19-15
19.5.5	Summary of Impacts	19-16
19.6	Control and Management Strategies	19-16
19.6.1	Impact Minimisation	19-16
19.6.2	Compliance	19-17
19.7	Residual Risk Assessment	19-17
19.7.1	Construction Aboriginal Heritage Risks	19-18
19.7.2	Operational Aboriginal Heritage Risks	19-18
19.7.3	Summary of Risks	19-19
19.8	Findings and Conclusion	19-19
20	Non-Aboriginal Heritage	20-1
20.1	Applicable Legislation and Standards	20-1
20.2	Assessment Method	20-1
20.3	Existing Environment	20-2
20.3.1	Port Site	20-2
20.3.2	Infrastructure Corridor	20-2
20.3.3	Proposed Long-Term Employee Village	20-7
20.3.4	Summary of Key Environmental Values	20-10
20.4	Design Measures to Protect Environmental Values	20-10
20.5	Impact Assessment	20-10
20.6	Control and Management Strategies	20-10
20.7	Residual Risk Assessment	20-10
20.8	Findings and Conclusion	20-11

21	Economic Environment	21-1
21.1	Applicable Legislation and Standards	21-3
21.2	Assessment Method	21-3
21.2.1	Study Area	21-3
21.2.2	Profiling the Existing Economic Environment	21-6
21.2.3	Modelling to Identify Potential Impact and Benefits	21-6
21.2.4	Impact Classification.....	21-8
21.3	Existing Environment	21-9
21.3.1	Overview of Existing Economic Environment in Regional and Local Study Area	21-9
21.3.2	Existing Economic Value and Job Numbers.....	21-10
21.4	Design Modifications to Protect Economic Values.....	21-12
21.5	Impact Assessment	21-12
21.5.1	Construction	21-14
21.5.2	Operations.....	21-17
21.5.3	Additional Benefits	21-19
21.5.4	Summary of Impacts.....	21-21
21.6	Control and Management Strategies.....	21-21
21.7	Residual Risk Assessment	21-23
21.8	Findings and Conclusion	21-24
22	Social Environment	22-1

Appendices Volume One

- Appendix A: Major Development Declaration
- Appendix B: Iron Road Environment Policy
- Appendix C: EIS Guidelines
- Appendix D: DAC EIS Guidelines Comparison
- Appendix E: Contributions and Project Team
- Appendix F: IAP2's Public Participation Spectrum
- Appendix G: CEIP Community Consultative Committee Terms of Reference
- Appendix H: Tumby Bay District Council Community Consultative Group Terms of Reference
- Appendix I: Community Survey Results
- Appendix J: Air Quality Assessment
- Appendix K: Greenhouse Gas Impact Assessment
- Appendix L: Environmental Noise and Vibration Assessment – Cape Hardy Port Facility
- Appendix M: Environmental Noise and Vibration Assessment – Infrastructure and Long Term Employee Village
- Appendix N: Predicted Railway Noise Figures

Appendices Volume Two

- Appendix O: Infrastructure Corridor Ecological Assessment
- Appendix P: Port Terrestrial Ecology Baseline Survey

Appendices Volume Three

- Appendix Q: Marine and Coastal Environment Impact Assessment
- Appendix R: Cape Hardy Coastal Modelling
- Appendix S: Marine Environmental Noise Assessment

Appendices Volume Four

- Appendix T: Spencer Gulf Recorded Whale Sightings
- Appendix U: Infrastructure Groundwater Impact Assessment
- Appendix V: Kielpa Groundwater Supply Study
- Appendix W: Traffic Impact Assessment
- Appendix X: Economic Impact Assessment

Appendices Volume Five

- Appendix Y: Social Impact Assessment
- Appendix Z: Viewpoint Assessments
- Appendix AA: Draft – Construction Environmental Management Plan (CEMP)
- Appendix BB: Draft – Operation Environmental Management Plan (OEMP)
- Appendix CC: Stakeholder Consultation Issues and Benefits Register Summary
